SHIJINRAJ.K

STUDENT DEVELOPER · AI & ROBOTICS ENTHUSIAST

Kasaragod, Kerala, India
shijinrajx@gmail.com

GitHub: github.com/shijinrajx7
LinkedIn: not provided

PROFILE

Class 10 student and independent developer interested in artificial intelligence, robotics, and software engineering. Enjoys experimenting with Python, Flutter, Linux, and AI-powered applications, with a focus on turning ambitious ideas into practical projects.

EDUCATION

Government High School, Kolathur — Class 10, Kerala State SCERT

Academic year: 2026–2027 · Academic score: not provided

SELECTED PROJECTS

NOVA — Desktop AI Companion

Experimental desktop companion project focused on an animated interface, voice interaction, AI assistance, and system-tool integration.

Tech: Python · Godot · NVIDIA NIM · Repository/demo links not provided

Life OS — Student Productivity

Student productivity app concept focused on tasks, reminders, study routines, and a dark futuristic interface.

Tech: Flutter · Dart · Repository/demo links not provided

Gesture Control PC

Computer-vision experiment exploring hand-gesture-based computer interaction; implemented features are not yet verified.

Tech: Python · Computer Vision · Repository/demo links not provided

ACHIEVEMENTS

- USS and LSS — reported achievements; years and full details not provided.
- Robotics Fest — District 3rd place.
- LK District Camp — member; exact camp details not provided.

SKILLS & INTERESTS

Programming: Python, Dart (experience level not formally assessed)
Frameworks/tools: Flutter, Godot, PySide6, Ubuntu Linux, VS Code, Antigravity, OpenCode, Vercel
Interests: AI integration, robotics, computer vision, desktop apps, AI agents

Note: Project descriptions reflect concepts discussed; completion status and repository links are not verified. No internships, professional employment, or certifications have been claimed.
